

# EVERBRITE COATINGS

## SURFACE INNOVATION INDUSTRIAL COATINGS Everbrite Coatings are Ideal When Conditions are Not

Our clear coating systems meet the diversity and durability needs of industrial and commercial facilities with products to restore and protect metals and other surfaces from environmental damage such as oxidation, tarnish and the growth of microbes.

Our coatings are easy to apply and easy to maintain indefinitely.

Everbrite Coatings are ideal for high touch surfaces where appearance, longevity and pristine cleanliness matters. Our coatings are free from carcinogens, for the safety of those that apply the products, and live and work with coated surfaces.

### EVERBRITE™

Everbrite™ is a clear, protective UV coating formulated to restore color and luster to dull, faded, oxidized metal of any color.

### PROTECTA<sup>Clear</sup>®

ProtectaClear® is a tough, thin, clear coating for high touch surfaces providing protection from salt damage, tarnish, corrosion, and oxidation.

### CROBIAL COAT™

MICROBAN®

CrobialCoat™ with Microban antimicrobial technology is a clear coating providing protection for most surfaces from environmental damage, while helping to prevent the spread and growth of microbes.

### EQUIPCOAT™

EquipCoat™ is a long-lasting, clear polymer resin coating that protects heavy duty equipment from rust and oxidation, and also restores faded paint color to pre-owned equipment.

## Building Restoration

- Superior Quality Coating
- One Part, No Mixing, No Waste
- Self-leveling, Self-annealing
- Clean, Dry & Re-Apply
- No Need to Strip for Maintenance
- Graffiti Resistant

### Storage Doors

Everbrite will restore your old, faded, dull, chalky doors and metal buildings to look new again and will restore the original color and luster.

### Copper

Copper is an excellent metal for architectural projects but it tarnishes and oxidizes, losing its distinctive copper color. Everbrite restores and keeps copper looking its best.

### Brass

Tarnish and oxidation dull, darken, and corrode architectural brass. Everbrite, ProtectaClear and CrobialCoat stop tarnish and oxidation and will maintain the brilliance and shine for years to come.

### Stainless Steel

Stainless implies no rust or tea-stain; unfortunately, even marine grade stainless steel rusts and stains. ProtectaClear restores and protects stainless steel while reducing fingerprints and smudges, making cleaning a breeze.

### Aluminum

Polished and anodized aluminum can oxidize, corrode and darken. Everbrite restores the color and luster of Anodized Aluminum, and will protect the shine of polished aluminum for years to come.

### Bronze

Bronze fades and tarnishes. Polished bronze, oil rubbed bronze, and bronze with patina can be protected to seal out oxidation and tarnish, keeping the colors bright.

### Painted Metal

Painted metal substrates chalk, dull, and fade when exposed to the sun. Salt air also corrodes painted metal. Everbrite restores color and luster, protecting it from oxidation and fading in the future.

### Historic Preservation

Historic preservation, restoration and conservation is deeply important and must be completed with the utmost care. Everbrite's suite of products provide the necessary tools to care for historical monuments, artifacts, and buildings.

### Rusted Metal

Rusted metal, weathered steel and Cor-ten are rising trends in architecture but cause stains that drip onto areas under the metal. Everbrite seals and prevents drips and stains. Available in Natural, Satin, and Matte finishes.

### Custom

If you have a metal restoration project you're not sure how to protect, Everbrite can provide product advice and instructions.
